Excellence in Research for Australia 2015 Update

Dr Tim Cahill
Director, Research Evaluation
Introduction

There have been several changes to the Submission Guidelines for ERA 2015. However, the **ERA objectives are unchanged**:

1. establish an evaluation framework that gives government, industry, business and the wider community assurance of the excellence of research conducted in Australian higher education institutions;
2. provide a national stocktake of discipline level areas of research strength and areas where there is opportunity for development in Australian higher education institutions;
3. identify excellence across the full spectrum of research performance;
4. identify emerging research areas and opportunities for further development; and
5. allow for comparisons of research in Australia, nationally and internationally, for all discipline areas.

• Publisher Submission List was constructed by the ERA Team from ERA 2012 data
• ‘Other’ category available
Research report for an external body

A written research report commissioned or solicited by an external body such as a government department or private company.

To be eligible to be submitted, a research report must:
• meet the definition of research;
• not be eligible to be submitted as a traditional research output; and
• have been published or made publicly available during the reference period for research outputs.
Staff eligibility rule for less than 0.4 FTE

For staff who are employed at less than 0.4 FTE to be eligible to be submitted they must:

• be employed as ‘research only’ or ‘teaching and research’
• have at least one eligible research output associated with the submitting institution
• the ARC recognises there may be instances where a staff member does not meet the publication association due to significant career interruptions because of personal circumstances. In such circumstances, institutions may write to the ARC to explain why the staff member should be included in the institution’s submission
